PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience specializing in React and TypeScript, focused on building scalable, maintainable, and high-performance applications. Experienced in developing internal government systems and enterprise platforms with complex data flows and reliability requirements. Founder of an AI-powered SaaS product, with hands-on experience across frontend architecture, product delivery, and backend integrations using Supabase. Currently expanding into full-stack development with Node.js and Express.js.

TECHNICAL SKILLS

Frontend:

React, TypeScript, Vite, Tailwind CSS, Redux Toolkit, SCSS/SASS, Ant Design

Engineering:

Type-safe component architecture, reusable component systems, custom hooks, error handling strategies, scalable project structure

API & Data:

REST APIs, Axios (interceptors & error handling), async/await patterns, pagination, filtering systems, real-time search

Backend & Integration:

Supabase (authentication, database), basic Node.js & Express.js

Tools & Workflow:

GitHub, GitLab, CI/CD workflows, Agile/Scrum, domain & deployment management

WORK EXPERIENCE

GokturkAI — Founder & Lead Frontend Developer

January 2026 – Present

- Built and launched an AI-powered SaaS platform (gokturkai.com) with 200+ customizable visual templates
 - Designed and implemented the frontend architecture using React, TypeScript, and Redux Toolkit
 - Developed a centralized authentication flow and admin dashboard for managing users and generated content
 - Integrated Supabase for authentication and data management, enabling structured handling of user assets
 - Improved application performance and loading behavior through optimized asset handling and efficient state management
 - Managed end-to-end product development including UI structure, deployment, and infrastructure setup
-

OPTIMA GROUP CO — Frontend Developer

2021 – 2023 | Azerbaijan

Government Systems (Internal Platforms):

- Developed internal administrative panels for platforms such as eVisa.az and genprosecutor.gov.az, focused on employee-side workflows
- Built secure and structured interfaces for managing sensitive application data
- Implemented advanced data tables, filtering systems, and API-driven pagination for large datasets
- Ensured maintainability and stability in systems used daily by government staff

Commercial Projects:

- Delivered responsive and SEO-friendly web platforms for brands including Volkswagen, Toyota, and Pizza-Mizza
- Focused on cross-browser compatibility, performance optimization, and clean UI implementation

Efficiency & Reusability:

- Built a reusable component system (tables, modals, buttons) using Ant Design
 - Standardized UI development across projects, reducing repetitive implementation effort
-

ERTIFICATIONS & LANGUAGES

Bachelor in Computer Software Engineering

Odlar Yurdu University, Azerbaijan (2020 – 2024)

Languages:

Turkish (Native), Azerbaijani (Native), English
(Professional)
